FINANCIAL STATEMENT
OF
HON. R. HARCOURT.

LEGISLATIVE ASSEMBLY,
TORONTO, 6th March, 1894.

It is my duty once more, Mr. Speaker, before moving that you do leave the Chair in order that the House may go into Committee of Supply, to give some explanations, more or less minute, of the somewhat varied financial transactions of the Province for the year 1893. At the same time I propose, with the approval of the House, to speak in a general way of our revenues and expenditures of previous years, and, before closing, to make a hurried reference to our prospective revenues and expenditures. The whole subject, Mr. Speaker, has been so exhaustively dealt with from year to year, so frequently and so ably discussed from every point of view, that I cannot even hope to present it in any new light or to point out any object of interest hitherto unnoticed. I promise, Mr. Speaker, not to detain the House as long as I have done on one or two similar occasions. At the same time I hope that not a few honorable members, whether supporting or opposing the Government, will, as always heretofore, take part in the discussion, and give to the House fully and unreservedly the benefit of their criticisms and suggestions. I invite, beforehand, exhaustive discussion, full inquiry, and minute investigation. It has always been found convenient, and I will

therefore follow the usual practice on this occasion, to speak in the first place of the receipts of the past year.

RECEIPTS, 1893.

		<u>\$4,291,914 01</u>

Honorable members will notice, I am sure, with satisfaction that our total receipts for 1893 amounted to \$4,291,914. This amount includes, it will be seen, an item of \$200,000, representing Dominion bonds, which has regularly appeared in our schedule of assets as one of our investments during recent years. These bonds matured early in 1893, and the Dominion Government promptly paid them at date of maturity. Excluding these bonds, as well as all payments received during the year, to the amount of \$52,257 on account of the drainage debentures we hold representing loans made by us to the municipalities, our total

receipts for 1893 were \$4,039,657. It has not been customary to take into consideration in our estimate of the year's receipts these payments made on account of drainage debentures. We are constantly loaning to the municipalities on the security of their debentures for drainage purposes, and we are constantly in receipt of payments made by the municipalities on account of these loans.

For example, we made fresh loans in 1893 to the amount of \$62,495, and we received \$52,257 on account of loans previously made. I estimated last season that our revenue for 1893 would amount to \$4,030,572. We actually received \$95,466 over and above this estimate. This, we will all concede, is a very satisfactory result. The first item of receipts, that of our subsidy and specific grant, remains, of course, at the same figure from year to year.

INTEREST RECEIPTS.

The next item, that of interest received from the Dominion, may require a brief explanation. If honorable members will refer to the schedule of receipts appended to my last financial statement, they will observe in the column reserved for interest receipts, that from 1868 to 1883 inclusive, a period of fifteen years, these receipts are stated to be exactly the same in amount each year, viz., \$136,696, or \$68,348 for each half year. This amount represents interest at the rate of 5 per cent. on the various sums then held and still held by the Dominion in trust for Ontario. It was not until July, 1873, however, that a remittance was sent to us specifically as a half-year's interest. From July 1st, 1873, up to and including July 1st, 1888, the Dominion remitted to us each half year as interest on trust funds \$68,348. This amount is made up of three sums, viz., interest on Upper Canada Building Fund, \$33,809; interest on Upper Canada Grammar School Fund, \$7,819; interest on Common School Fund, \$23,719. The interest on the Common School Fund was subject to variation, since the amount of it depended on our population relative to that of Quebec. Our share increases each decade, and the amount I have named is that which it yielded under

the census of 1871. From 1873 to 1884, therefore, these payments of interest, fixed and definite in number, were specifically made to us half yearly as interest on what we call our trust funds. Prior to 1873 the payments, although the same in amount, were not specifically made as interest. They came in a lump sum with the subsidy. These interest receipts, as will be noticed, were increased in 1884. That is the year in which, by virtue of the Dominion Act, 47 Vict., chap. 4, there was placed to the credit of Ontario the capitalized sum of \$2,848,289. I will remind the House briefly why this credit was given to us, and how the amount was arrived at. At Confederation the Dominion assumed the debts of the late Province of Canada, to the amount of \$62,500,000. In other words each of the Provinces by the terms of Confederation was allowed to enter the union, taking with it a certain amount of debt. It was provided further by statute that the excess of debt over this \$62,500,000 should be divided between Ontario and Quebec, that these Provinces should pay interest on this excess, and that this interest should be deducted half yearly from their subsidy and specific grant. On 1st January, 1868, and each succeeding half year up to 1st January, 1873, the Dominion charged the interest on the whole of the excess of debt jointly against Ontario and Quebec without attempting division. In 1873 an Act was passed relieving the Provinces of the excess of debt as then ascertained, \$10,506,088, so that on the 1st of July, 1873, for the first time we received our subsidy and specific grant in full and free from any deductions for interest on excess of debt. This Act of 1873 readjusted and increased the subsidies payable under the B. N. A. Act, but the increase dated only from the 1st of July, 1873. The Act of 1884, deals with an increase to the subsidy, and presumably was to restore to us the deductions from subsidy which we would have received if the increase had dated from the 1st of July, 1867, instead of from 1st of July, 1873. These deductions from subsidy as capitalized by the Act, the Act declares shall be deemed "capital owing to the said

Provinces respectively, bearing interest at 5 per cent. per annum, which interest shall be payable to them as part of their yearly subsidies." In 1884, then, for the first time, we received interest on this capitalized sum of \$2,848,289, amounting to \$71,207 each half year, which was paid to us along with the other specific payments of interest on the trust funds up to July 1, 1888.

On 1st January, 1889, the Dominion Government, in order to carry out the agreement of October, 1888, to which I will more fully refer hereafter, remitted to us specifically the subsidy of \$598,436, and also a payment of \$130,000 "on account of pending settlement of accounts." Since January 1, 1889, the Dominion Government ceased making specific payments of interest, and instead, have each half year sent us round sums as payments on account.

We received in 1893 as interest on our investments \$79,897, and this is our largest receipt under this head for several years past. Of this amount the main items are \$18,272, which represents a year's interest on the drainage debentures we hold, and \$55,444 received from the banks as interest on sums specially deposited with them from time to time. In other words, our cash investments brought us in during 1893 \$217 a day by way of interest, while the interest paid us by the banks alone represents 4 per cent. on a capital investment of \$1,400,000.

From the Crown Lands Department we received last year \$1,823,550. This is \$23,550 in excess of my estimate. From the woods and forests branch alone we received \$1,757,005. From our public institutions we received \$79,846, exclusive of all receipts from the Central Prison, to which I will make special reference. From these institutions, omitting the Prison, we expected to receive \$78,700, so that our actual receipt is slightly in excess of our estimate. Detailed particulars of all the operations at the Central Prison for 1893 will be found in the report of the Inspector of Prisons. Honorable members will notice that, in addition to the details

given in this report, there is appended for the first time to the public accounts of the year an abstract of the receipts and expenditures of the Prison. The new binder twine industry, which commenced operations in March last, and other new and important features in connection with the Prison industries, will warrant the Provincial Secretary in giving at an early date fullest explanations.

We received from the Education Department \$47,640. Our estimate was \$45,000. These receipts are made up of, for the most part, fees received from students attending our Normal Schools, and fees paid by the candidates at the departmental examinations. Normal School students paid last year \$16,873, and departmental examination candidates \$24,093. The students attending the School of Pedagogy paid \$1,835, and those attending the School of Practical Science \$2,510. We received from law stamps \$84,246, or nearly \$6,000 under our estimate. In 1892 we received \$91,617, and in 1890 \$90,349. On the other hand, the receipts for 1889 and 1891 are very similar in amount to the receipts of last year.

RECEIPTS FOR LICENSES.

We received from liquor licenses in 1893 \$294,517, being \$240 less than our receipts of last year. In 1889 there was issued 3,560 licenses; in 1890, 3,523; in 1891, 3,414; in 1892, 3,369; in 1893, 3,195; a falling off in four years of 365 licenses. In 1875 there was granted one license to each 275 of our population. In 1893 we granted one license to each 633 of our population. According to the latest returns there is one license to every 150 of the population of the State of New York, one to every 246 in Illinois, one to every 248 in Ohio, one to every 294 in Indiana, and one to every 300 in Michigan. With this steady and rapid reduction in the number of licenses, with hotels possessing much better accommodations than formerly, with a complete separation of groceries

from liquor shops, with sales to minors prohibited, with numerous other restrictions, each of them making for sobriety, we can, I think, reasonably claim that our license laws have brought about a marked and business-like abatement of the evils of the liquor traffic. The Province received for its own use as revenue from licenses (I am speaking of the calendar year) in 1889, \$302,734; in 1890, \$312,007; in 1891, \$298,184; in 1892, \$294,758; in 1893, \$294,517; and gave back to the municipalities in the same years, viz., in 1889, \$297,353; in 1890, \$294,968; in 1891, \$289,487; in 1892, \$289,977; in 1893, \$287,649. It will be remembered that Municipal Councils may by by-laws, and without asking the assent of the electors, require a larger duty to be paid for tavern and shop licenses, and retain for their own use the revenue thus derived. They cannot, however, exact a duty, which, added to the statutory duty, will exceed \$200, unless the by-law has been approved of by the electors. Only in 318 out of 808 municipalities have the Councils passed by-laws increasing the duties, and in only six of them throughout the whole Province were the fees increased beyond this limit of \$200. These six were Brockville, Port Hope, Bowmanville, Chatham, Sudbury and Rat Portage. We have in all 808 municipalities in the Province. In 528 of them there is not a single shop license, and in 185 of them, nearly one-fourth of the whole number, there is no license granted of any kind whatever. Since September, 1890, local option by-laws have been carried in 28 municipalities and defeated in 12. In 15 municipalities where these by-laws were carried, they were afterwards set aside by the courts. At present local option prevails in only 12 municipalities, in which formerly 28 licenses were issued. In the Province of Quebec the receipts from licenses are very much larger, (more than twice as much, in fact,) than they are in Ontario. The Quebec Government received from licenses in 1890-1, \$586,206; in 1891-2, \$607,989; in 1892-3, \$672,757; and did not return a dollar of it to the municipalities. In this Province, as has been seen, we return to the municipalities about one-half of the total amount received.

CASUAL REVENUE.

Under the head of casual revenue it will be noticed that we received in 1893 \$117,463. This is nearly twice as much as we have ever received in any previous year, save 1892. Deducting our receipts from succession duties, which in 1893 amounted to \$45,507, we have still left as casual revenue \$62,248, and this amount is twice as large as our casual receipts of ten years ago. Our casual revenue is a growing revenue, and material increases may, I think, be expected from year to year. During last year we received nearly \$2,000 more from the Secretary's office than we did in 1892; \$2,500 more by way of fines, \$1,400 more from the *Official Gazette*, and \$1,400 more under the Insurance Act of 1892.

SUCCESSION DUTIES.

Our receipts under the Succession Duties Act during last year exceeded our expectations. It will be remembered that the Act came into force July 1, 1892, and that the duties accruing under it became due and payable at the death of the deceased, or within eighteen months thereafter. A period of eighteen months having elapsed since the Act came into force, we may now expect regular and continuous receipts. I ventured to remark last year that it would be found that our experience would resemble that of other countries in regard to succession duties, that our Act would work fairly, that it would not be vexatious, that it would prove as little burdensome as any substitute that could be devised. An experience of nearly two years fully confirms this belief. I would remind honorable members that our receipts under this Act are, by the express terms of the Act itself, allocated to the support of our hospitals and asylums. In 1893 we spent by way of grants to hospitals and charities \$164,896. We need not be surprised if within a few years our receipts by way of succession duties will balance our grants to hospitals and charities. Our Act, it will be borne in mind, exempts all estates which do not exceed \$10,000. Near relatives, such as father, mother, children, husband, wife, etc., pay no duties whatever except when the estate exceeds \$100,000. All property given

or bequeathed for religious, charitable or educational purposes is also exempt. Similar laws in other countries—England, New York State, Pennsylvania and Maryland, for example—apply to and affect thousands of estates which, under our law, are altogether exempt. Since the passage of our Act, every Province in the Dominion has passed a law similar to it. The States of Ohio, Maine and California passed similar laws in 1893. California takes 5 per cent. of the value of all estates over \$500 in value, and devotes the proceeds to its school fund. In Minnesota a constitutional amendment, authorizing the taxation of inheritances, is to be submitted to the people next year. We exempt 981 estates out of every 1,000, judging from the results in 1893, and the scale of duties which we in each case exact is very moderate. Our receipts in 1893, amounting to, as I have said, \$45,507, were paid by 27 estates, ten of which were the estates of persons resident in the County of York. Two estates, one in Ottawa and one in Toronto, taken together, paid duty to the amount of \$29,227, which is more than one-half of our total receipts for the year. These two were estates of unmarried men, whose property passed to collateral and not near relations. In only one estate out of these 27 was any duty paid by the very near relatives of the deceased, such as wife or children, and this was an estate in Toronto valued over the \$100,000 limit. The Surrogate Court clerks in the Province have sent me full returns for 1893 of the estates for which probates or letters of administration were issued. Altogether they report 4,574 estates, and of all these only 88, or one out of every 52, were liable to pay succession duty. Twenty of these 88 belong to the County of York, and 61 of them are still unsettled and outstanding and have not as yet paid the duties. In 15 counties in the Province not a single estate in 1893 came within the provisions of the Act. In the State of New York it is estimated that one estate out of every 35 is liable to duty. In this Province one out of every 52 pays duty. The State of New York for the year ending September 30, 1893, received as revenue under its Inheritance Act \$3,071,687; the State of Pennsylvania for the year ending November 30, 1893, \$1,124,466; and the State of Maryland for the last fiscal year \$70,693.

EXPENDITURES.

I will now turn to the expenditure side of our account for the year 1893, and briefly comment upon its more important features.

EXPENDITURE, 1893.

Civil Government.....	\$241,621 63
Legislation	138,924 82
Administration of Justice	380,652 34
Education	662,520 69

Miscellaneous.....	179,648 59
	3,371,748 98
Drainage Debentures.....	48,295 07
“ “ (Tile)	14,200 00
Railway Aid Certificates	145,416 44
Annuity “	74,200 00
New Parliament Buildings	159,690 30
Brockville Lunatic Asylum.....	92,385 03
Land Improvement Fund (Special)	1,209 50
	<u>\$3,907,145 32</u>

I have already said that our actual receipts for the year exceeded our estimated receipts by \$95,466. I am glad to be able to say that we have also kept our expenditures well under the estimate. The House voted for the services of 1893 \$3,571,789. We actually spent (I am speaking of ordinary expenditures) \$3,371,748. We then received \$95,466 more than our estimate, and expended \$200,041 less than the House gave us authority to spend. In the case of each of thirteen leading services we spent considerably less than the House voted. For example, we spent for civil government \$5,000 less than was voted, for administration of justice \$22,000 less than was voted, \$5,000 less for maintenance of public institutions, \$58,000

less for public buildings, \$23,000 less for public works, and \$33,000 less for charges on Crown lands. Our total expenditures for 1893 were \$161,112 less than those of 1892, \$251,314 less than those of 1891, and only \$10,821 more than those of 1890. We are happily agreed in this House as to many matters affecting the administration of our finances. The differences between us, for example, as to the great bulk of our expenditures concern matters of mere detail only, and, when fully analyzed, are few and unimportant.

EDUCATIONAL EXPENDITURES.

As one illustration of this fact, I would point to our large and increasing educational grants, which now absorb no less than one-sixth of our total expenditures. Out of every six dollars we spend, one goes for educational purposes. As to these grants we are all of one mind in this House, and no one even suggests a reduction, although year by year there is invariably and unavoidably—indeed, I might say automatically—an increased expenditure. On the other hand, if our revenues permitted it, we would, I venture to say, without a dissenting voice, make even more substantial increases each year to our votes for educational purposes. We spent in 1893 under the head of Education \$662,521. This is \$83,077 more than we spent in 1888, and \$149,174 more than we spent in 1883. No fair-minded person seeks to find in these large increases a matter of legitimate criticism, or because of them attach a particle of blame to the Administration. On the contrary, a neglect on the part of the Government to make prompt and adequate provision for those pressing educational needs which from time to time force themselves upon our notice would loudly call for well-merited rebuke. During the last ten years our educational grants in the aggregate have amounted to \$5,968,710. In other words, we have in ten years directly returned to the people this vast sum of money to be spent by them in lessening their local educational rate bills. Each year brings with it new educational expenditures, imperatively called for by the growing needs of our expanding system. A few illustrations will, I hope, not be out of place. In 1890, for example—I will take recent years

—we appropriated money for the first time for a training school for French teachers, and for three years we have spent \$950 each year for this purpose. This expenditure has led to very satisfactory results. Honorable gentlemen will, I know, read with great interest a clear and full report on this subject recently issued by the Education Department. In 1891 we gave our first grant to kindergarten schools, and since that time we have spent \$7,370 for their encouragement. This special expenditure is approved of by every one who has given any attention, even the slightest, to educational problems. We have 66 kindergarten schools in the Province, employing 160 teachers, and having an attendance of nearly 7,000 scholars. We also began to assist night schools in 1891, and our grants in their aid since that date have amounted to \$2,762. In 1892 our first expenditure in connection with the Public School Leaving Examination was incurred, and in two years we have given for this purpose \$1,970. In 1891 also we commenced our grants under the various heads of training teachers in new districts, School of Pedagogy, and school inspection in cities and towns, and since that time we have spent for these three new services, respectively, and in the order named \$2,385, \$18,188, and \$9,045. In the short space of three years, therefore, our educational expenditures in completely new directions, in which we had hitherto not spent anything, have aggregated no less a sum than \$44,570. And these are samples only of increased expenditures to which not one word of objection was ever taken in this House or elsewhere.

I have said that our educational system is expanding and that therefore increased expenditures year by year are unavoidable. I will refer briefly to some facts in support of this statement. In 1892 we had 397 more Public School teachers and 95 more High School teachers than we had in 1889. We had 65 more Mechanics' Institutes and Free Libraries in 1893 than in 1889, and therefore while our grants to Mechanics' Institutes and Libraries amounted to \$31,429 in 1889, they were increased to \$44,476 in 1893. We spent \$4,500 more on our Normal Schools in 1893 than we did in 1889. We had nine more High Schools and 197 more Public Schools in 1893 than in

1889. We had 4,200 more High School pupils in 1892 than in 1889 and our High School grant was \$2,100 larger in 1893 than in 1889. Our grants to Public, Separate and Poor schools were \$4,673 more in 1893 than in 1889. Nor have we had occasion at any time to regret any of these new or increased expenditures. The position of the Province, educationally considered, is admittedly an enviable one. No country offers to its every child, all things considered, greater or better school facilities or privileges than ours. While primary education, the education imparted in our Public Schools, is our first and chief concern, we have not neglected the secondary education which our High Schools afford. Indeed, we dare not do so, since the healthy and sound growth of the one is inseparably connected with that of the other. I will be allowed, sir, in this connection to remind the House of the glowing tribute paid to our school system by Sir Richard Webster, the cultured and scholarly Attorney-General of Lord Salisbury's Government, who, in speaking of our educational exhibit at Chicago, said (I give his own words), "That it was one of the most beautiful and instructive in the whole exhibition; that it was the only exhibit which at all approached his ideal of what an educational exhibit should be; that it was the most perfect in arrangement, and explanatory in a simple and satisfactory way of the finest practical system of public education from the kindergarten to the university that the world affords to-day." A few months ago several of the principals of the Normal Schools of New York State, men of very high standing educationally, visited this city, inspected our various educational institutions, and made most careful inquiry concerning them. These learned and experienced professors and teachers publicly spoke in the very highest terms of our school system in general, and especially of our provision for giving to every teacher a professional training. The numerous awards secured by our educational exhibit at the Chicago Exposition, to which the Minister in charge will make extended reference, furnish clearest proof that this Province, in the very important matter of education, has won for itself an enviable position. (Ministerial applause).

PUBLIC INSTITUTIONS.

Our largest single appropriation is that voted for the maintenance of our public institutions. We vote now each year three times as much for this service as we did twenty years ago. Our annual appropriation is 25 per cent. more than it was ten years ago. We spent in 1893 for this service \$128,095 more than we did five years ago, and \$170,452 more than we did ten years ago. We expended in 1893 for this one purpose the enormous sum of \$778,839, which is more than one-fifth of our total expenditures for that year. And this House, I am glad to say, is practically unanimous in making this large yearly appropriation for this very important service. It is true that objection has been taken in committee by one or two members in regard to some very trifling matters of detail. It is contended, for example, by some members of the Opposition that as to some of the table supplies purchased for the asylums a saving, admittedly very inconsiderable in amount, could be effected. Even if this contention were well founded, and I do not admit it for a single moment, all the items thus objected to in this large yearly appropriation of \$800,000 would not in the aggregate amount to one-tenth of one per cent. In caring for our unfortunate insane, we cannot ignore the serious responsibilities we have assumed. Our assumption of these responsibilities means, be it remembered, that the burdens of the various municipalities in the Province are lightened exactly in proportion to the expense which the Province from time incurs. No State in the Union, no other Province in the Dominion assumes these responsibilities to the same extent. We must continue to provide for the insane, and to furnish additional accommodation when required, or else, as unfortunately happened not many years ago, allow them to drift into and occupy cells in our county gaols. We must furnish them with comfortable homes and provide them with good, wholesome and nutritious food. Our new cottage asylum at Mimico has accommodation for 560 patients. During last year it had under treatment 593 patients. The new Orillia Asylum has accommodation for 550 patients, and last year it had under treatment at different times 553 inmates. Later on I will make further

reference to these new buildings. The rapidly increasing number of patients compelled us to provide this enlarged accommodation, and to incur therefor heavy capital expenditures. In our asylums we had in 1887, 3,553 inmates, in 1888, 3,808 inmates, in 1889, 3,953 inmates, in 1890, 4,187 inmates, in 1891, 4,972 inmates, in 1892, 4,785 inmates, in 1893, 4,893 inmates, being an increase of 1,340 patients in six years. The extra accommodation provided in 1891 accounts for the increased admissions of that year. With this constantly increasing number of patients, no one save a charlatan will expect either stationary or decreasing expenditure. At all times the Minister in charge of these institutions has earnestly and methodically aimed at two things, namely, rigid economy and highest efficiency. He has succeeded in a striking degree in both regards. I could quote, Sir, from the highest and most impartial authority, and give to the House the testimony of experts and alienists of distinguished reputation, and prove conclusively that our large asylums which now, taken together, contain nearly 5,000 inmates, the maintenance of which costs the Province more than \$1,370 a day, are second to none in the matter of efficient management, when compared with those of any other State or country. I need not argue this point. Honorable members of the Opposition are not disposed to dispute it. They prefer, as we do, while rejoicing at the fact, to determine to leave nothing undone which would lighten the sufferings of the afflicted of this Province, or place within their reach the best possible available treatment. As regards the other question, that of economy, how is it, I want to know, that the per capita cost for maintenance of patients in our asylums is noticeably lower than that of similar institutions elsewhere? I have at hand a schedule showing the cost per patient according to the last return in each of 78 asylums in the United States. The average yearly cost per patient in these 78 asylums is \$227.88. The average cost per patient in our asylums was for the year 1893, \$135.71. Deducting the revenue received from paying patients, our average was only \$119.67 per patient, or not much more than half the cost in these 78 similar institutions in the United States. In the State of Massachusetts there are five asylums similar to ours, and in them the average yearly cost per patient is

\$334 13, or two and a half times as much as our average. In New York State the average yearly cost per patient in the eight asylums is \$345.83; and in Ohio, with its six asylums, it is \$227.88. Our average cost per week for each patient for asylum maintenance is \$2.66. In the New York State hospitals for the insane the cost averaged for three years per week has been \$5.18, or nearly twice as much as ours. The average cost per week for each patient in 76 asylums in the United States has been \$4.13, or 50 per cent. more than ours. The cost per week in the Montreal Hospital for the Insane has been \$3.42, or 30 per cent. more than ours. The cost in similar institutions in England averaged over a long period of years has been \$2.92 per week. New South Wales has five institutions like ours, and the average cost there per week for a long number of years has been \$3.73. Our officials, one and all, well understand that every account rendered, even the smallest, will be subject to the closest scrutiny. The inspectors, men of wide experience and practical knowledge, acquaint themselves with minutest details, and are thus constantly in a position to insist that there shall be in the matter of the purchase of supplies neither waste nor extravagance. As the wholesale dealers testify, our bursars take advantage of the keen competition existing in all branches of trade, and thus secure the best bargains available. Considering the excellent, wholesome and nutritious dietary which we furnish, the per capita cost of maintenance is, all must admit, surprisingly low. In all cases where practicable, and where it can be done with advantage to the Province, the supplies for the public institutions are purchased by tender.

PUBLIC BUILDINGS.

We have a still more striking illustration of uncontrollable expenditures when we come to consider the large sums we have spent in recent years, especially the last four or five years, on public buildings. We spent in 1892, for example, on new buildings, including these new Parliament buildings, \$778,315, and this amounts to more than one-fifth of all our expenditures for that year. For several years past our expenditures under this head have been unusually

large. During the last five years we have spent in this way \$3,167,656. During the previous five years we spent \$1,479,634. Not a dollar of this expenditure was ever questioned, either in this House or in any Committee of this House. There has been no want of opportunity for full inquiry and thorough investigation. In each instance it was recognized that our urgent needs called for the erection of new buildings, and that any further delay would be inexcusable, and against the public interest. The work was commenced in each case not one day too soon. To meet pressing needs we commenced the erection of the main building and the eight asylum cottages at Mimico in November, 1888. These were completed in March, 1891. In June, 1891, the erection of two additional cottages for refractory patients was commenced, and these were finished in April, 1892. Up to the end of 1893 we had expended on these new buildings, which furnish excellent accommodation for 600 patients, the large sum of \$535,760. The Province owns in connection with these buildings a valuable plot of ground containing 57 acres. In 1885 we commenced the erection at Orillia of two cottages, with kitchen and outbuildings, for the accommodation of idiots. These were completed in 1887. The main front building and dining hall were commenced in 1889 and completed in 1891. These buildings furnish perfect accommodation for 600 patients, and their cost up to December, 1893, is \$484,722. We own 150 acres of land in connection with this institution. In October, 1892, we commenced to build a new asylum at Brockville. One part of this, namely, the main building, will, we expect, be completed this year. It will, when finished, accommodate 500 patients. We gave \$15,000 for the farm of 150 acres adjoining Brockville, on which it is built. Up to the end of 1893 we have expended on this new asylum \$112,823. As to all of these buildings, tenders were called for, and the contracts let in the usual way—I mean, of course, Mr. Speaker, the usual way as far as this Province is concerned, the buildings have been completed, and no question is now raised, or has ever been raised, in this House as to the character of the buildings, their adaptability to our business

needs, or as to their cost. Every member in this House must admit that the Commissioner of Public Works has succeeded in erecting these large public buildings, which are a credit to the Province, at, all things considered, a marvellously low cost, and that, as a result of his skilful management, mastery of details, careful supervision and firm control, tens of thousands of dollars have been saved to the Province. This large, wealthy and important Province is now well equipped in the matter of public buildings, and we will be pardoned, in these days, at any rate, when we recall with pride and satisfaction the undisputed and indisputable fact that in their erection not one dollar of our very large appropriations has ever been diverted from its proper purpose. To meet well-defined and pressing public wants in this direction a largely-increased expenditure was imperatively needed. To speak at large in a general, heedless and irresponsible way of increased expenditures, to make nebulous insinuations of extravagance, and to keep carefully out of sight such explanations as I am hurriedly giving, is, I submit, neither honest nor patriotic. These new asylums to which I have referred, and the new Parliament buildings, have cost us, up to the end of 1893, \$2,400,596. Most of the money has been spent during this very Parliament, and yet not one minute of the time of this House, or of any Committee of this House, has been spent in discussing this vast expenditure of money, or of any part of it. In considering these questions we must not forget that the statute which provided for the erection of new Parliament buildings set apart for sale certain lands, the proceeds when sold to form the Parliament buildings construction fund. One of the parcels of land so set apart was the site of the old Parliament buildings, $9\frac{1}{4}$ acres in extent, situate in the heart of this city. Owing to the marked depression in real estate we have not sold this very valuable property, worth say \$500,000. We have erected these new buildings without borrowing a single dollar, and still own very valuable properties which the Legislature authorized us to sell, the proceeds of which, it was expected, would go a long way towards the erection of the new buildings. Another of these properties, consisting of $21\frac{1}{2}$ acres, part of the asylum farm, and valued at \$150,000,

is still unsold. I wish to remind the House that in these two properties alone the Province has a valuable asset, estimated to be worth \$650,000. (Applause.)

EXPENDITURE FOR AGRICULTURE.

No one will learn with disappointment that our expenditures under the head of agriculture and arts are constantly increasing year by year. We spent, for example, \$127,906 in 1890, \$149,535 in 1891, \$167,282 in 1892 and \$169,573 in 1893. No one in the House or out of it, so far as I know, ever complained of these increases. All the conditions of successful farming, indeed all economic conditions, have so changed in recent years that agricultural problems, at no time as simple or easy as the majority of people seem to imagine, are now especially complicated and puzzling. The successful solution of these problems means everything for this Province. Agriculture is, and must always be, the very basis of our prosperity; and for this reason our people will continue to approve of and demand liberal grants in its aid, and will encourage, in any and every form, the dissemination of useful information pertaining to agriculture. I am sure it will be conceded that there has always been manifested on the part of this Government an earnest desire to aid and encourage in every way possible every branch of agriculture. It will also be conceded that the Minister of Agriculture has been successful in many ways in increasing the usefulness of his very important Department. But I desired especially to speak of increased expenditures and to point out that they were both justifiable and unavoidable, and in nearly every instance made with the consent and approval of the whole House. I will speak of some of the more important increases in this Department made during the last four or five years. The Department of Agriculture was created in 1888, and this involved, amongst other things, sundry new Departmental expenses, such as printing, stationery, postage, etc., amounting to about \$1,700 a year.

Mr. CLANCY: Was that expenditure consented to on this side of the House?

The TREASURER: Does my honorable friend also intend to move for the abolition of the Agricultural Department? I welcome the interruption of my honorable friend as a sure indication of his defeat at the coming elections. (Loud Ministerial applause.) No objection was taken to the creation of the Department by any member of the House; all conceded that the change was desirable and in the best interests of the Province. I am not forgetting that recently the President of the Young Men's Conservative Club of this city, in his inaugural address delivered in November, 1893, pronounced against the Department of Agriculture, and contended that it would be in the best interests of the Province, as well as true economy, to do away with it, and to make it a mere minor branch or appendix of some other Department. The leader of the Opposition also, I was astonished to learn, recently expressed a somewhat similar view. I can assure the House that this Government has no sympathy whatever with that view; that, on the other hand, everything possible will be done to strengthen and build up this important Department and add to its usefulness. Since 1888 five new electoral district societies have been incorporated, our annual grants to them amounting to \$3,550. We have also given, commencing with 1892, \$100 additional to each of our 85 electoral district societies, and this called for the considerable annual increase of \$8,500 a year. We have also been giving during recent years to the Dominion Sheep Breeders' Association and to the Swine Breeders' Association \$700 a year each, and for bee-keepers' inspection and expenses \$800 a year. These are all new items, representing, in the aggregate, a very considerable increase, and yet no word of objection was ever taken to a single one of them at any time in the House. And these are only a few of the agricultural increases. At the College there have been recently instituted not a few very valuable new services. For example, an assistant chemist was added to the staff in 1891, at \$900 a year; a horticulturist in 1893, also at \$900 a year; an assistant dairyman and laborers in the dairy department, at a charge of \$1,300 a year; and an assistant gardener, at \$500 a year. Then in the very important matter of experimental work, which but few individual farmers can afford to do, but which the Province, through

the institution at Guelph, is expected to do, there has been a constantly growing expenditure. Only \$500 was spent in this way in 1888, while in 1893 we spent \$5,611. The immense importance of this work amply justifies this expenditure. Those who have visited the farm and inspected the experimental plots consider them as forming one of the most useful features of the whole institution. The travelling dairy, the wide usefulness of which is generally recognized throughout the Province, has been in existence only three years, during which time we have spent upon it \$13,505. This is a new expenditure, which has been the means of awakening a great degree of interest in one of the most important departments of agriculture. No one would now think of suggesting a curtailment of the expense which it involves. In 1891 the travelling dairies visited five counties, in addition to some of our largest fall exhibitions; in 1892 28 counties were visited; and in 1893 16 counties and districts. No less than 659 meetings have been held under their auspices, so that the whole Province has to some extent shared in the great benefits they confer. I fully believe that the College (never before so popular as now) and its adjuncts, its dairy school, its travelling dairies, its summer dairy school and its experimental work, have proved themselves to be in a high degree instrumental in diffusing and popularising advanced scientific methods of agriculture, and that very satisfactory practical results are even now plainly apparent. Over and above all this I might refer to our signal success at the Chicago Exposition as furnishing conclusive proof that Ontario has greatly advanced, and is advancing, in everything relating to agriculture. Others will, during the Session, doubtless enlarge upon this interesting topic, and speak in detail of the extremely creditable position won by the Province. If a comparison is had either with different States of the Union or with the rest of the Dominion, the result must be highly gratifying to our people; and our successes, it will be noted, were not limited to one or two departments only. (Applause.)

ADMINISTRATION OF JUSTICE.

As another illustration, take our large yearly grants under the head of "Administration of Justice." The increases under this head from time to time are very noticeable. We spent, for example, in 1883 \$105,407 more than we did in 1883. In 1883 we spent \$275,245, and in 1893 \$380,652, being an increase of 38 per cent. in ten years. We are of one mind in this House as to this large expenditure, which it will be noticed absorbs about one-tenth of our total expenditures, and over which, everyone must admit, the Government can have but little practical control. It represents, for the most part, expenditures made in the different counties by our county officials for the every-day administration of criminal justice, for all of which we reimburse the counties. Our total expenditure on account of the administration of justice in 1889 was \$368,186; in 1890, \$393,828; in 1891, \$401,690; in 1892, \$394,134; in 1893, \$385,837. Of these amounts we paid to County Treasurers and other county officials on account of administration of justice in counties and districts in 1889, \$276,472; in 1890, \$289,508; in 1891, \$286,739; in 1892, \$291,656; in 1893, \$263,455. In each of these years, therefore, we paid to the County Treasurers and other county officials nearly 75 per cent. of our total expenditure, and in this way, and to this extent, the municipalities in this one direction were directly aided from the public chest. During the four years from 1889 to 1892 inclusive the County of Brant, for example, received from our grants for administration of justice \$24,009, the County of Middlesex \$41,372, the County of Carleton \$27,599, the County of Hastings \$34,560 and the County of Simcoe \$28,230. Our vote for the administration of justice has been increased in recent years by the common consent of the House in many ways; for example, by the payment of witnesses in criminal cases, by the payment of official reporters in the courts, by the appointment of stipendiary magistrates and other needed officials here and there in Northern Ontario. I will give some further instances of recent increases, which every one in the House deemed unavoidable, and which were urgently called for by the needs of the

public. Since 1883, for example, the annual vote of the House for the litigation of constitutional questions has been more than doubled. In the former year it was \$5,000; it is now \$12,000. In 1885 an addition to the Government detective service was made, at a yearly cost of \$1,000, and the same year, for the first time, we voted for the Provincial police service at Detroit River \$800, and this vote has since been more than doubled. In 1886 it became imperatively necessary to appoint in New Ontario, in the District of Rainy River, a Sheriff, also a Registrar of Deeds, and a Deputy Clerk for the District Court at Thunder Bay, and these appointments involved an annual expense of \$1,450. In 1889 a Sheriff and a Clerk of the District Court were appointed both at Parry Sound and at Bracebridge, at an annual cost to the Province of \$2,100. In 1890 it became necessary, in order to secure efficient administration of justice, to appoint a District Attorney, a Clerk of the Peace and a Police Magistrate for Muskoka and Parry Sound, and this involved a new yearly outlay of \$900. In 1892 a Police Magistrate for Fort William and Rat Portage was appointed. In the same year, for the first time, we have a Referee under the Drainage Act, paid by the Province. It was fully believed on all sides that this appointment would greatly lessen litigation and expense in drainage matters. The result has amply shown that this belief was well founded. No one of these new expenditures was found fault with or opposed by hon. gentlemen opposite. It was admitted that the public interest required and demanded each and every one of them. But, further, in 1884, three new lock-ups were built at Sudbury, Huntsville and Bracebridge; in 1886, two more at Fort William and Burk's Falls; in 1889, one at North Bay; in 1892, one at French River; and in 1893, one at Rainy River. Aside from cost of construction, or capital expenditure, the maintenance of these lock-ups involves considerable expense. Last year the amounts paid for salaries and maintenance of the gaols and lock-ups in the new districts of Northern Ontario cost the Province \$13,660.

CIVIL GOVERNMENT.

Will it be said that the cost of Civil Government and of Legislation is unduly increasing, and that in these services particularly the Government has it in its power to exercise economy? The volume of business has greatly increased in each of the Departments. The number of reports and the volume of printing done each year is constantly increasing. These items the House and the Printing Committee may limit if they choose. There is an over-expenditure, for example, in 1893, classed as "incidentals" under agriculture. It is largely due to the increasing cost of preparing, printing and distributing the various agricultural reports and bulletins, for which there is so great a demand. There were 28,200 more reports issued in 1893 than in 1892. There were 54,490 more reports published for the Departments in 1893 than in 1892, at an increased cost of \$2,912. Let me illustrate by one Department the great increase in business which is common to all of them. In 1871 we had 59 public institutions, all told, including asylums, hospitals, gaols, etc. In 1892 we had 155 such institutions. In 1871 the number of persons admitted to them was 14,456. In 1892 the number admitted was 37,950. The number of letters written in connection with their management in 1871 was 1,749, while in 1892 it was 9,874. In 1871 the estates of lunatics in our asylums were not managed by the Inspector. In 1892 the Senior Inspector had charge of 661 of these estates. In 1871 the revenue received from paying patients was \$18,894. In 1892 it was \$136,406.

As to Civil Government, in order to make fair or honest comparisons, the increasing volume of business must be kept in mind; and, what is more important, we must remember that some branches and departments of the service now come under civil government, and are charged against it, which formerly did not appear under that head. In comparing different years we must eliminate from the latter year the cost of services which did not exist at all during the former year, or which at the earlier period were not charged against civil government. For example, the Education Office, with its salaries and expenses, was

not charged under Civil Government prior to 1880. This alone added \$19,268 to the cost of Civil Government for that year. Then the Board of Health was not established until 1883, and it added \$8,671 to Civil Government. The Mining Bureau, a new service, first appeared in the Crown Lands expenditure, but was transferred to Civil Government in 1892. It cost us in 1893 \$7,885. The Department of Agriculture was established in 1888, and it increased the cost of Civil Government that year by \$11,798. A comparison with other Governments will show that we have kept down as low as the public interests would admit the cost of both Civil Government and Legislation. Let us take, for example, the period during which the present Government at Ottawa has been in office, viz., 1878 to 1892. During this period of fourteen years the cost of Civil Government in Ontario has increased (I take the same services for both years) 17 per cent. Under the Government at Ottawa for the same period it has increased 60 per cent. Or take four years, say from 1888 to 1892. In Ontario it has increased 8 per cent., while at Ottawa it has increased 27 per cent. (See Schedule "A" of Appendix as to 1883 to 1893.) The cost of Legislation has increased from 1878 to 1892 in Ontario less than 5 per cent., and at Ottawa 85 per cent. From 1888 to 1892 it has increased $4\frac{1}{2}$ per cent. in Ontario, and 64 per cent. at Ottawa. (See Schedule "B" of Appendix.)

I have thus far been speaking of our ordinary expenditures. Apart from these, there were in 1893 special expenditures, such as \$62,495 loaned to different municipalities for drainage purposes; we retired railway certificates and annuities to the amount of \$219,616; we spent on these new buildings \$159,690, and on the Brockville Asylum \$92,385. There were other exceptional expenditures, such as \$84,384 for the World's Columbian Exposition, \$10,234 for arbitration between the Dominion and the Provinces, \$5,000 for the School of Mining and Agriculture at Kingston, and \$3,398 in connection with Algonquin Park.

RAILWAY AID.

It will be noticed that after next year the payments required to retire maturing railway certificates will materially decrease year by year for the next seven or eight years. For example, the payment will be in round numbers \$5,000 less in 1896 ; \$25,000 less in 1897 ; \$53,000 less in 1898 ; \$68,000 less in 1899, and \$74,000 less in 1900 than the payment of this year. In nine years it will decrease to the extent of \$101,000. We have aided railways most generously. Since Confederation and up to the close of 1893 our total grants to railways have amounted to \$5,959,084. It is very gratifying to know that the amount we have yet to pay is trifling compared with the amount we have paid. We have paid directly, that is in cash, \$1,704,195. We have issued and paid certificates to the amount of no less than \$4,254,889, and the outstanding certificates, those yet to pay, amount to only \$1,312,149. But these outstanding certificates do not carry interest, and are spread over a long term of years. Their present value amounts to only \$922,091. The present value of the annuities is \$1,319,775, and these are our only obligations. When I inform the House that we have this very hour at our credit in the banks more than \$1,550,000, I submit that these obligations are not very alarming. If time allowed I could explain all the items which make up our increased expenditures one by one, and show conclusively that they are in each case the outcome of a constant pressure of new duties and obligations, and that they have one and all resulted in giving to the Province an extension and improvement of the services theretofore existing. Why, Sir, as long ago as 1869, 25 years ago, the Hon. E. B. Wood, Treasurer in the Administration of the Hon. John Sandfield Macdonald, in discussing our financial position, said :—"Our expenses will increase every year, do what we may to prevent them ; as our population increases, so will our wants." These are the words of the first Treasurer of the Province. Since that date, 1869, our population has increased by more than 500,000, and new territory, vast in extent, has been opened up, so that a Government would have been recreant to its every trust if it had refused from time to time to

enlarge existing services, or to grant the new services which, in a hundred different directions the development of the Province loudly demanded. (Applause.)

I will now make a brief reference to the assets and liabilities of the Province.

ASSETS OF THE PROVINCE.

1.—DIRECT INVESTMENTS :—

Drainage, 5 per cent. debentures invested 31st December, 1893.....	\$234,664 64
Tile, 5 per cent. debentures invested 31st December, 1893.....	104,531 86
Drainage Works—Municipal amounts..	156,554 79
Other debentures, etc.....	4,821 00
	\$500,572 29

2.—CAPITAL HELD AND DEBTS DUE BY THE DOMINION TO ONTARIO, BEARING IN- TEREST :—

U. C. Grammar School Fund (2 Vict., Cap. 10) ..	\$ 312,769 04
U. C. Building Fund (18 Sect., Act 1854)	1,472,391 41
Land Improvement Fund (see Award)..	124,685 18
The Capital under Act 1884.	\$2,848,289 52
Less estimated balance due the Dominion	1,544,000 00
	1,304,289 52
	3,214,135 15

COMMON SCHOOL FUND :—

Collections by late Province of Canada held by the Dominion under the award of 3rd Sept., 1870	1,520,950 24

Surplus of Assets after deducting Liabilities presently payable..		<u>6,135,480 49</u>

Our schedule of interest-bearing assets differs in some respects from that of last year and previous years. The Dominion 6 per cent. bonds, as I have already said, matured early in 1893, and were paid at date of maturity. Our investments in drainage debentures remain at about the same figure as last year.

ARBITRATION PROCEEDINGS.

Owing to the partial award (bearing date November 2, 1893,) of the arbitrators to whom were referred for settlement certain questions respecting the allowance of interest and other matters incident to the taking of accounts which had arisen between the Provinces of Ontario and Quebec and the Dominion, the statement of those of

our assets which appear under the head of "Capital held and debts due by the Dominion to Ontario," varies from that of last year. Section 3 of this award reads as follows :—"That on and from the 1st of July, 1884, the Provinces of Ontario and Quebec shall be credited with the additional subsidy granted by the Act of 47 Vict., ch. 4, in the proportion determined for the excess of debt by the award hereinbefore mentioned." The capitalized amount of this additional subsidy granted by this Act to Ontario is \$2,848,289, as previously explained. Under this section, therefore, we again place to our credit the sum of \$2,848,289, which was included as one of our assets in the financial statements of my predecessor for each of the years, 1884 to 1888, inclusive. We were credited with this sum as additional subsidy by the Act of 1884, and therefore it appears for the first time to our credit in the statement of 1885. Since 1888 we have not included it as an asset, because in October of that year an agreement was entered into between the Dominion and the Provinces under which the Provinces gave up the benefits of the Act of 1884. The effect of this agreement was to take this sum of \$2,848,289 out of the credit side of our account, and the sum of \$73,006,088 was to be credited to the Province of Canada, as of date July 1, 1867, instead of as of date 23 May, 1873; also that the charges made against the Province for interest on the excess of debt between 1867 and 1873 were struck out, and to secure this the Provinces were willing to give up the increased subsidy under the Act of 1884, and the Dominion thenceforward stopped paying such increased subsidy. We have relied on and acted on this agreement of 1888, and our statements of assets since that time have been prepared in accordance with its terms. The Dominion has also recognised this agreement of 1888 in various ways. It has prepared and exhibited accounts showing balances in favor of the Provinces. The accounts delivered to Ontario by the Dominion in January, 1889, show a balance in favor of Ontario of \$1,408,417. (See Arbitration Exhibit X, page 33.) This credit of \$1,408,417 appears to our credit, because the Dominion, acting under the agreement of October, 1888, retained the amount of \$2,848,289. In

July last at Quebec, during the progress of the arbitration, it was contended by the Dominion for the first time that this agreement was not binding. The Provinces had been satisfied with it, and the Dominion had acquiesced in and acted upon it up to that time. It was contended last July that this agreement was *ultra vires*; that Sir John Thompson and Mr. Foster, who were parties to it, had no right to make it, and that it was not in accordance with the Acts of 1873 and 1884. The arbitrators have decided that the Dominion Government, whose members framed these statutes, has not properly interpreted them, and that the agreement into which it entered was contrary to the terms of these statutes. The effect of this decision, as I have said, is to restore to us as an interest-bearing asset this sum of \$2,848,289. This necessitates a revision of the accounts. Our accountant estimates that a complete revision of the accounts will show that this credit of \$2,848,289 will be reduced by \$1,544,000, and that the final balance in connection with these open accounts in favor of Ontario, the whole account being taken into consideration, will be \$1,304,289. This balance is larger than that we claimed last year. I wish to place, side by side, for convenient reference, my statement of 11th April last year with my statement of to-day as to these accounts. I estimated last year before an award was made that the balance due us on these open accounts was \$1,090,519 (\$1,590,519 less the \$500,000 bonds). In the light of the partial award, I now estimate it to be \$1,304,289. I am confident that the balance of \$1,544,000 referred to, which is the estimate of our accountant, will be found to be a fair estimate. It is only an estimate, since there are several unadjusted items, which cannot be settled until a final award is made. This estimate is the result of a calculation allowing the Province interest up to such time as the Dominion owed Ontario, *i. e.*, on current account only. It does not allow the Dominion interest on over payments made on current account, because Ontario did not accept such overpayments as liable to interest, and because when the payments were made the accounts prepared by the Dominion showed a balance of \$1,408,417 at our credit. In crediting us with this balance they did so under the agreement of October, 1888, which they now ignore. The Dominion claims interest on these over-payments, and the Province resists the claim.

Interest, to be claimable, must rest on a contract. The Provinces did not contract to pay interest on such payments. The payments were made on an agreement which the Dominion now sees fit to ignore. The arbitrators have reserved their decision on this point and for that reason further explanation is not desirable. The Provinces have so far accepted the award of 2nd November, 1893. The Dominion is dissatisfied with it, and has appealed against it, on the ground that the Act of 1884 compensated the Provinces for one half year's interest on the excess of debts more than is charged in the accounts of the Dominion, and that such half year's interest (\$262,652) should be charged against Ontario and Quebec. The Provinces feel confident that the contention of the Dominion will not be sustained, but this is a matter which, pending the appeal, need not be discussed.

Before leaving this branch of my subject I wish to call attention to an important clause of the partial award of the arbitrators made November, 1893. Clause three reads as follows:—

“That the trust funds shall be treated as intact and unimpaired and interest thereon at the rate of 5 per cent. per annum carried half-yearly into the separate accounts of Ontario and Quebec.”

Counsel for the Dominion and the Province were agreed that the trust funds referred to in this clause amount to \$3,351,728.

We commenced the year with a credit bank balance of \$613,787, of which \$550,000 was on special deposit. Our total receipts for the year were \$4,291,914, and our total expenditures, \$3,905,685 (including \$1,460, being amount of stationery distributed by the Queen's Printer in excess of purchases), so that on the 31st of December, 1893, we had on hand in the banks, \$1,000,016.

Of this last named sum, \$925,000 was on special deposit.

OTHER ASSETS.

As I have previously stated we have other assets. All commercial corporations, such as banks, insurance companies or business firms in preparing a balance sheet invariably include all their properties of whatever nature as assets. If we followed this method

our balance sheet would show assets and a surplus ten times as large as the amounts I have named. I have not included, for example, (1) the valuable public buildings erected and owned by the Province; (2) the site of the old Parliament buildings, valued at \$500,000, and the parcel of 21 acres, part of the Queen street asylum farm, valued at \$150,000; (3) unpaid purchase moneys on sales of Crown lands to the amount of \$800,000; (4) the standing timber on a vast extent of territory; (5) unsold Crown lands, including our mineral lands; (6) a yearly subsidy of \$1,196,000 guaranteed to us in perpetuity under the B.N.A. Act, and a further amount of \$142,000 a year granted to us for all time under the Dominion Act of 1884. Our critics choose completely to forget the existence of these very important and valuable assets; they wholly ignore them and never by any chance even allude to them.

I see my honorable friend from West Kent smiles. He and his friends generally frown when we speak about the assets of the Province. They seem to find neither comfort nor satisfaction in discussing our assets. The untold wealth of the Province, actual and potential, its abundant assets are to them dry and uninteresting topics and they scrupulously avoid all reference to them. They grow cheerful and happy only when they dwell upon our future railway liabilities which are rapidly diminishing in amount and the payment of which is spread over a long term of years. They apparently forget that the policy of aiding railways was initiated by John Sandfield-Macdonald, that, with very rare exceptions, no one ever opposed these railway grants and that they themselves, in nearly every instance, voted to grant the aid to the railways, which created the very liability, the existence of which they now deplore. (Ministerial applause.)

OUR RAILWAY LIABILITY.

As in former years, I will now give fullest particulars of the amounts payable annually for "aid to railways" and "annuities." These liabilities of the Province are not ordinary debts, inasmuch as they are not presently payable and do not bear interest before becoming payable.

We have never classed them as ordinary debts.' No Government treats obligations of this special character as part of the ordinary public debt.

The Dominion Government, the Manitoba Government, amongst others, have large railway liabilities of exactly the same nature and have always treated them exactly as we do.

The Dominion Government has issued from time to time, and continues to issue, railway certificates exactly the same as ours, payable year by year without interest during the currency of a fixed term of years, and it has never included them in any statement of the debts of the Dominion. If these annual railway payments and annuities extending over a period of more than 30 years and not drawing interest are to be capitalized and treated as a present debt, then, to be consistent so as to treat the credit and debit sides of the account alike, we must be allowed to capitalize our fixed yearly receipts guaranteed to us for all time and not limited to 10, 20 or 30 years, the Dominion subsidy for example, and treat them as present assets. If we capitalize these railway certificates and annuities their present value would amount to \$2,241,867. This at 4 per cent. would entail an annual interest charge on the Province of \$89,694. On the other hand, we received last year as interest on our trust funds and investments more than \$300,000. If the railway certificates and annuities are to be capitalized and treated as a present debt, then we must place to our credit as a present existing asset, at least \$7,500,000, being the capitalized amount which at 4 per cent. would yield this \$300,000. The annual interest charge on our future railway obligations, if capitalized, would be \$89,694. The annual interest charges on the debt of the Province of Quebec is more than seventeen times this sum (\$1,500,000), while the annual charges on the debt of the Dominion amount to more than 101 times as much (\$10,021,000). Our railway obligations are diminishing, while the debt of the Dominion is increasing. We have the right to insist that the same mode of book-keeping and of computation shall be applied alike to assets and liabilities. The Attorney-General, speaking recently at Whitby, in discussing this question, said :—"As to the

railway certificates and annuities, they say that, though not yet payable, they are debts of the Province. I agree that, in an account setting forth (as I have been doing) all our assets on one side, all our liabilities of every kind should be set down on the other side, and at whatever sum may be proper. But if in the account or balance sheet you only set down some of our assets, and, in fact, but a small part of them, what then? Why set future liabilities against these special assets? Why set future liabilities which bear no interest, against items which bear interest, when the account leaves out all other assets? The accruing interest on the special items of interest-bearing assets will be far more than enough every year to pay accruing annuities and certificates coming due in that year. The interest received on the items specified in the Treasurer's last financial statement amounted on the 31st December, 1892, to \$336,729, while the railway certificates and annuities due in 1893 were \$219,616 only. The amount for the Province to pay in 1897 will be considerably less than it was in 1893, and there will be a further drop in subsequent years.

"So, again, even if we had not that interest coming in, we should have an annuity accruing to us every year of more than five times the railway annuities and certificates which we have to pay in that year; and this annuity is not amongst the assets from which is shown the surplus of five millions or more. What common sense, then, is there in saying that the annuities which in future years we have to pay are not to go against the annuity to be received, or the interest accruing, in those years, but against our cash capital bearing interest?

"The Opposition pretence that, in stating the amount of our debts presently payable, these other liabilities should be added as ordinary debts, is specially curious in that the argument is in the direct teeth of the practice of their own party at Ottawa, as I have already intimated, though the Dominion has no accruing revenue worth speaking of from timber or Crown lands, or from other sources, corresponding with the items of Provincial assets which the Treasurer names. The Dominion treats all annuities, whether

terminable or permanent, as on the same footing with the payments which have to be made every year for legislation and government, and other matters of yearly occurrence, and I am not aware that anyone has had any objection to that. The Dominion has issued railway certificates, payable at future annual dates, like the railway certificates and annuities of this Province. But they are never set down in the public accounts or otherwise among the debts of the Dominion. So, in the Year Book for 1892, published by the Dominion Government, the Ontario railway annuities are expressly treated in like manner. This book has a table (p. 176) of 'Provincial Debts,' and debts of all the other Provinces are given by the Dominion in this table, but none of Ontario. Our annuities are thus spoken of in this Dominion book :

"The Province of Ontario has sold annuities to the extent of \$1,432,519 to provide for railway expenditures, but these amounts are paid off by a fixed sum every year, and, while a liability, do not stand on exactly the same footing as ordinary public debts."

"But railway annuities are not the only annuities payable by the Dominion and never included in its public accounts or otherwise as debts. Large annuities are payable by the Dominion to the several Provinces under the B. N. A. Act, or under subsequent Dominion legislation, and these, like the railway annuities, are not added up or capitalized and included in the amount set down as debt, yet they are liabilities just as much as the railway obligations of this Province are liabilities, and are, in fact, more like debts, because they are permanent annuities, instead of being terminable like the railway annuities of the Province. But, in the judgment of the Dominion Government, though liabilities, these annuities and future annual payments do not stand on the same footing as the public debt, but they are like any other necessary payments of yearly occurrence.

"So, also, the Dominion is under liability for annuities to retired officers of the Government, amounting annually to about a quarter of a million dollars, considerably more than Ontario's annual liability for railway certificates and annuities, and these Dominion obligations are not taken into account as Dominion debts. Thus, in

this matter, as in so many others, our opponents pretend to find fault with the Ontario Government for things which, as supporters of the Dominion Government, they have to defend, and on far inferior grounds."

The small liabilities of the Province set out in the schedule in the hands of honorable members explain themselves and call for no remark. Suffice it on this branch of my subject to repeat that we had in cash in our banks at the end of 1893 more than a million of dollars; that we have this very day to our credit in the banks more than \$1,550,000, and that our surplus of assets, after deducting all liabilities at present payable, amounted at the end of the year to \$6,135,480.49. (Applause.)

Total		

We estimate that our revenue for this year (1894) will reach \$3,146,872. We expect to receive much less from the Crown Lands Department than we did last year, and this is the main point of difference in the two years. This estimate is moderate, and the actual receipts will, as usual, doubtless considerably exceed it. The expenditure estimates amount to \$3,415,663. As heretofore, we will be careful to keep well within the estimate. My expectations in this regard have been fulfilled each year. We are asking \$16,000 more for education, and \$12,000 more for administration of justice than we asked last year. As I have already said, the expenditures of 1893 were considerably less than those either of 1891 or 1892. The expenditures of 1894, I venture to say, will be notably less than those of any year for several years past. We now have large deposits in the banks, and at the end of 1894 we will still have a large cash balance at our credit. (Applause.)

A COMPARISON.

Our financial condition, Sir, is sound and encouraging, view it as we will. If we take even a hurried glance at the finances of the other Provinces, or of the Dominion itself, we will quickly return to our own balance sheet with feelings of intense pride and satisfaction. The Treasurer of Quebec, in his financial statement, delivered last December, informs us that the excess of liabilities of that Province over assets at June 30th, 1893, the close of their financial year, was \$22,951,680. During the current financial year he estimates that he will be called upon to expend for interest and charges on their public debt alone the alarming sum of \$1,527,296. The gross debt of the Province of Quebec is about \$23,000,000, and both political parties in that Province, I regret to say, Liberal as well as Conservative Administrations, must share the divided responsibility for a financial policy both vicious and wasteful, for a state of things so disastrous. The debts of the other Provinces, and they are by no means as yet very alarming, are as follows:— New Brunswick, nearly \$2,000,000; Nova Scotia, \$1,764,932; Manitoba, \$2,209,000; British Columbia, 620,844. Nova Scotia

will this year pay about \$125,000 interest on her debt. Our own Province of Ontario, on the other hand, presents a striking contrast to this somewhat gloomy outlook, and can point to a cash surplus over and above all liabilities of whatever nature of millions of dollars. The Dominion Government, since it took office fifteen years ago, has added more than \$101,000,000 to the public debt, and, concurrently with a rapidly increasing debt, has given us increased taxation. The net public debt of the Dominion is about \$242,000,000, or more than \$50 per head for its every inhabitant. It has increased \$550,000 during the past year, and the annual charge on the debt has grown from \$7,241,000 in 1878, to \$10,021,000 in 1893. The Province of Quebec, unable to get new loans, even at high rates of interest, has been compelled to resort to new taxes, levied upon the mercantile and professional classes. For the past three years its direct taxes on commercial corporations have averaged more than \$138,000. Last year it received by way of taxes on transfers of property \$292,000, and for trading and manufacturing licenses more than \$145,000. The people of Ontario, as the result of careful, prudent and economical government, have never been called upon to pay a dollar of taxation in any one of these directions. Under its license laws (I am again speaking of Quebec), it received during the last three years respectively \$586,000, \$608,000 and \$672,757. Our license receipts for the same three years were respectively \$298,184, \$294,758 and \$294,159. In other words, the Province of Quebec has received, by way of licenses, \$887,101 during the last three years more than Ontario. Further, as to several large and important services, our grants, each of them materially lightening the burdens of the people, have largely exceeded those of the Province of Quebec. For example, we spent last year for the purposes of education \$277,091 more than was spent by Quebec; \$57,109 more for agriculture and immigration, and \$578,024 more for asylums and charities. On the other hand, the Quebec Government spent for administration of justice \$208,634 more than Ontario. Or, taking these four leading services together, viz., education, asylums and charities, agriculture and administration of

justice, we returned to our municipalities and gave back to the people by means of these grants in the year 1893 the large sum of \$703,590 more than was thus returned by the Province of Quebec. This difference is even more striking when we remember that in 1893 the Quebec Government levied and collected new taxes, altogether unknown to the people of this Province, to the amount of more than half a million of dollars. These new taxes were levied on commercial corporations, on transfers of property and included receipts for manufacturing and trading licenses.

A RETROSPECT.

This is the closing session of our seventh Parliament. This fact of itself compels retrospection. With every confidence we point to the financial record of the Mowat Government, embracing the long period of twenty-two years. There is not a stain or a blot upon a single page of it ; not one act of maladministration can be pointed to in all these years. Millions of dollars have been spent in the this direction and in that, but not a dollar misappropriated. Its watch-words have been "efficient service and strictest economy." In all directions economy has been enforced wherever possible and desirable revenue has been developed ; and at all times the public credit has been maintained. No deserving public object has been overlooked ; no interest or locality has been unduly favored. There has been neither parsimony on the one hand nor waste on the other. Timely and generous aid, amounting to millions of dollars, has been given to schools, to hospitals, to railways and to public works. On six occasions we have sold small portions of our timber assets, obtaining for them every dollar they were worth, and converted the proceeds into other assets of a useful and more permanent character. By our timber sales there has been a conversion of assets, not a lessening or a waste of assets. For example, our last and by far most successful sale realized \$2,305,000, or nearly half of the proceeds of all our six sales taken together. It was held in 1892. During this Parliament, as I have already mentioned, we have witnessed the completion of these new buildings, and of the large asylums

at Mimico and Orillia, at a cost up to the end of 1893, of \$2,400,596 and without our borrowing a single dollar. We have, on the one hand, \$2,300,000 less of timber, but in its place, on the other hand, we have \$2,400,000 worth of indispensable and substantial public buildings. Our critics admitted the urgent need of the buildings, and have never even suggested that our ordinary revenue would suffice to build them. We could then only take one of two courses, viz., convert some of our assets into buildings or borrow money. We took the former course, and they cry out, "You are wasting our assets." Had we taken the latter course, the course always followed by the other Provinces and the Dominion under similar circumstances, they would have said, "You are crushing the Province under a load of debt." Notice again the large sums returned to the people. During this last Parliament we spent for the following purposes :—

Education	\$2,586,940	31
Public Institutions maintenance.....	3,187,697	21
Agriculture.....	614,297	10
Hospitals and charities.....	610,251	18
Public buildings.....	1,580,344	42
Public works.....	109,712	77
Colonization roads.....	439,367	26
Railways.....	804,467	50
New Parliament buildings.....	833,353	32
In all.....	\$10,766,431	07

Our ordinary revenue more than suffices for ordinary expenditure. No one ever expected that it would, in addition to the many grants to which I have referred, suffice to meet large special capital expenditures. The supporters of the Ottawa Government, in their attempts to justify the immense and growing debt of the Dominion, invariably point to their large capital expenditures, such as those on public works. In their fervor and excitement our critics further say, "You are treating timber revenue as ordinary revenue." The Sandfield-Macdonald Government so treated it, likewise every Conservative Government at Ottawa. Every member of the Sandfield-

Macdonald Government took it for granted that the proceeds of land and timber sales should be treated as ordinary revenue. Sir Leonard Tilley, in his budget speech of 1884, treats the proceeds of sales of North-west lands as ordinary revenue. The Sandfield-Macdonald Government had four timber sales, one during each year of his term of office. The Mowat Government has had six sales during 22 years' tenure of office.

The last session of a Parliament both compels retrospection and invites forecast. We may well view our future not only with complacency, but also with amplest hope. The potential wealth of the Province in forest, field and mine is immense, almost incalculable. If our forest wealth alone, and by far the greater part of it remains intact, is husbanded and cared for in the future as in the past ; if in our sales of small portions of it from time to time we continue to realize the highest possible prices, all fear of failing revenue or of borrowing will continue to be an impalpable spectre for generations yet to come. We may confidently expect to maintain our present revenue, while, as I have already indicated, our yearly expenditures for railway aid and public buildings will be materially reduced.

The people of this Province, in the exercise of their sovereign power, will soon be called upon once again to pass verdict upon the financial record of the Administration of my honored friend, the leader of this House. Tried by his record, his every supporter, as well as every friend of honest, efficient and economical government, will hopefully and confidently await the result. (Loud Applause).

I move, Mr. Speaker, that you do now leave the chair.
